

Nokta Legend Coil Cover / Skidplate

Brand: Nokta • Category: Accessories & Spare Parts

Overview

The search coil is the flat disc at the end of your detector that sweeps the ground and senses metal. A skidplate (also called a coil cover) is a hard plastic guard that snaps over the underside of that disc — the face that scrapes along rock and gravel all day. Fit one and it takes the wear instead of the coil, so you replace a cheap plate now and then rather than a far more expensive coil. It clips on without tools and doesn't affect how the detector performs. This one is made for the Nokta Legend and Legend 2 — it fits the 28 cm (11") coil they come with.

Key features

- ✓ A hard plastic guard that snaps over the bottom face of your search coil
- ✓ Takes the scrapes from rock and gravel so the coil underneath stays intact
- ✓ Clips on without tools and doesn't reduce sensitivity or depth
- ✓ Made for the Nokta Legend & Legend 2 (fits their 28 cm coil)

Specifications

Type	Search-coil scuff guard / skidplate (wear part)
Fits	Nokta Legend & Legend 2 — the 28 cm (11") coil they ship with
Material	High-impact hard plastic (wear-resistant polymer)
Colour	Black (most models; some genuine covers white/beige)
Fitment	Snap-on - clips snugly over the base of the coil; no tools, removable
Coverage	Full underside - the wear surface that drags the ground
Effect on detection	None - no loss of sensitivity or depth, doesn't affect operation
Wet / underwater use	Fine in wet ground and submersion where the coil is waterproof
Weight added	Minimal (a few tens of grams)
Sold as	Single skidplate (one cover)
Replace when	Consumable - swap out once worn through to bare plastic
