

Padded Detector Carry Bag

Brand: Deep Lead • Category: Bags, Pouches & Storage

Overview

Get your detector to the goldfields in one piece. This long, padded soft bag swallows your whole detector with the coil still attached, so you're not unscrewing and rebuilding it every trip. The outer is a waterproof PVC-backed canvas and the inside is lined with quilted Dacron padding to keep knocks and scratches off your machine in transit. It's a universal fit that takes any detector up to its full length, so it suits everything we sell.

Key features

- ✓ A padded soft bag that carries your detector fully assembled, coil still on
- ✓ Universal fit: takes any detector at its full length, no need to break it down
- ✓ Quilted Dacron padding guards against knocks and scratches on the drive out
- ✓ Waterproof PVC-backed canvas with twin webbing carry handles
