

Detectorist Recovery Bundle

Brand: Deep Lead • Category: Beginner Bundles

Overview

Your detector tells you something's buried, but you still have to get it out — that's what detectorists call 'recovery', and this kit is the tool set for it. It pairs a Garrett pinpointer (a handheld probe that homes in on the exact spot once you're down in the hole) with a plastic sand scoop and a serrated digging knife for cutting a clean plug, and a belt pouch to hold what you find. It's the gear experienced detectorists tell every beginner to buy on day one.

What's included (4 items)

- ✓ Garrett Pro-Pointer AT Pinpointer
- ✓ Plastic Prospecting Sand Scoop
- ✓ Stealth Digger with Belt Holster
- ✓ Mega Finds Pouch

Full specifications for each item follow, one item per page.

Garrett Pro-Pointer AT Pinpointer

Brand: Garrett • Category: Pinpointers • Part number: 1140900

Overview

New to detecting? A pinpointer is a small hand-held probe for the last step of a dig: your detector gets you to roughly the right patch of ground, then the pinpointer shows exactly where the object is in the hole, beeping and vibrating faster as the tip closes in. The Pro-Pointer AT is the one you'll see on more belts than any other — tough, fully waterproof for use on land or in water, with a fast-retune button that quiets it down when it's beeping constantly so you can zero right in. It runs on a standard 9V battery, so there's no built-in lithium and no dangerous-goods shipping restrictions.

Key features

- ✓ A hand-held probe that finds the exact spot of your find once your detector has got you close
- ✓ Beeps and vibrates faster as the tip nears the metal; fully waterproof for land or water
- ✓ Fast-retune button settles it when it beeps constantly, so you can zero in precisely
- ✓ Runs on a standard 9V battery — no lithium, so it ships without dangerous-goods restrictions

Specifications

Brand / model	Garrett Pro-Pointer AT (part no. 1140900)
Operating frequency	11.5 kHz
Waterproof rating	IP68, submersible to 3 m (10 ft)
Dimensions	Length 22.9 cm (9 in); body 3.8 cm (1.5 in) tapering to 2.2 cm (0.875 in) thick
Weight	0.2 kg (6.5 oz), with battery in
Target alerts	Proportional audio + vibration pulse rate; LED flashlight; detects all metals (ferrous & non-ferrous)
Detection modes	Audio-plus-Vibrate or Vibrate-only (Silent); 3 sensitivity levels
Tuning	Automatic, plus one-touch manual Fast Retune
Battery	Single 9V (included)
Battery life	Alkaline 30 h; carbon 16 h; rechargeable 8 h
Warranty	3 years limited parts/labour
In the box	Pinpointer, woven belt holster, 9V battery

Plastic Prospecting Sand Scoop

Brand: Deep Lead • Category: Digging & Recovery Tools

Overview

A sand scoop is a small hand shovel for digging and sifting on loose ground: you scoop up the sand around your find, then let the loose sand sift away so the coin, ring or bit of gold is left sitting in the scoop. This one is moulded from tough plastic, so it's light on the arm all day and won't rust in salt water or wet sand. Because it's non-metallic, you can pass your detector or pinpointer straight over a scoopful without it setting off a false beep — handy for telling exactly when your find is in the scoop. Ideal for beaches and creek banks.

Key features

- ✓ A light plastic hand scoop for digging and sifting in sand and soft soil
- ✓ Scoop, then sift the loose sand away so your find stays in the scoop
- ✓ Non-metallic, so your detector or pinpointer won't beep on the scoop itself
- ✓ Tough and rust-proof — great on beaches and creek banks, and easy on the arm

Specifications

Type	Hand-held prospecting sand scoop / trowel
Material	One-piece moulded heavy-duty plastic (polypropylene-type)
Construction	Single-piece, reinforced — no seams or joins to fail
Non-metallic	Yes — pinpoint finds in the scoop without false signals
Overall length	~32 cm (12.5")
Weight	~100 g (3.5 oz)
Colour	High-visibility green (supplied colour may vary)
Digging edge	Bevelled leading edge to cut into sand and gravel
Riffles	Moulded internal riffles to trap and check for gold
Carry	Moulded lanyard hole in handle for belt/pack tether
Corrosion resistance	Rust- and corrosion-free; safe in salt water and wet sand
Best for	Beach, dry/wet sand, gold panning and shallow-water recovery

Stealth Digger with Belt Holster

Brand: Detect-Ed • Category: Digging & Recovery Tools

Overview

The Stealth Digger is a compact, tough digging knife for getting your finds out of the ground. Its serrated edge slices cleanly through turf and roots so you can cut a neat "plug" — the small lump of soil you lift out to reach the object, then drop straight back so the ground looks untouched. It comes with a belt holster so it rides on your hip and stays within reach. Recover quickly, and leave the spot the way you found it.

Key features

- ✓ A compact digging knife for cutting your finds out of the ground
- ✓ Serrated edge slices through turf and roots for a clean "plug" you can drop back in
- ✓ Cuts a neat hole, so you can leave the ground the way you found it
- ✓ Includes a belt holster so it's always on your hip

Specifications

Type	Hand digger / digging knife with belt holster
Blade length	19 cm (7.5")
Blade material	Carbon steel (bend-resistant)
Serrated edges	Two — serrated side edge plus leading edge near the tip (cuts roots)
Handle	Rubberised grip
Overall length	~28 cm (blade + handle)
Weight	500 g
Belt holster	Included branded sheath, 30 cm × 8.5 cm, belt-mount
Holster material	Nylon/Cordura-type fabric
Colour	Black
In the box	Stealth Digger + branded belt holster sheath

Mega Finds Pouch

Brand: Detect-Ed • Category: Bags, Pouches & Storage

Overview

A 'finds pouch' is a bag you wear on a belt around your waist, so you've got somewhere to drop what you dig up while both hands stay free to keep detecting. This is Detect-Ed's roomy version in tough canvas: a big open-top main pocket plus several smaller ones, so the good finds don't get jumbled in with the rubbish you'll also dig. It comes with its own adjustable belt, and there's a holster for a pinpointer, keeping everything to hand.

Key features

- ✓ A tough canvas pouch worn on a belt to hold what you dig up
- ✓ Big main pocket plus smaller ones — keep the good finds apart from the junk
- ✓ Its own adjustable belt, with a holster to hold a pinpointer
- ✓ Detect-Ed's Mega Pouch

Specifications

Brand / model	Detect-Ed Mega Pouch 2.0
Type	Metal-detecting finds & tool pouch (land & beach)
Material	Durable canvas
Colour	Black / green
Pouch dimensions	32 cm H x 29 cm W x 10 cm D (flexible)
Belt	Removable, adjustable 42–129 cm (16.5"–50.7")
Storage	Open-top main pocket, multiple internal pockets, expandable side pocket, zipped front pocket
Pinpointer holster	Yes — holds most pinpointers
Lanyard point	Yes
Weight	approx. 0.3 kg
Part number (MPN)	DE-042
