

Stoney Creek Frostline Jacket

Brand: Stoney Creek • Category: Apparel & Field Gear

Overview

The best detecting is autumn through spring, which on the central Victorian goldfields means cold, often damp days. This is a proper 3-layer softshell jacket: a warm grid-fleece lining inside, a breathable stretch membrane so you don't overheat swinging the coil, and a DWR water-repellent finish that sheds light rain and dew. Bayleaf/Black.

Key features

- ✓ Warm, breathable softshell for cold detecting days
- ✓ 3-layer fabric with a water-repellent (DWR) coating
- ✓ Grid-fleece lining; stretches so you can swing freely
- ✓ Bayleaf/Black; sizes S–5XL
