

10" Gold Pan (Kids & Finishing)

Brand: Deep Lead • Category: Gold Panning & Prospecting

Overview

A gold pan is a shallow dish you swirl creek dirt and water in so the heavy gold sinks and the lighter material washes out. This is the smaller 10-inch version, good for two jobs: it suits kids and smaller hands, and it's ideal for 'finishing', which is the careful last step where you tip the small amount of gold and dark sand left over from a big pan into this little pan and separate the gold at the end. A handy second pan to keep alongside a full-size one.

Key features

- ✓ A smaller 10-inch gold pan, a shallow dish for separating gold by swirling with water
- ✓ Great for kids and smaller hands
- ✓ Ideal for 'finishing', the careful last step after a big pan has done the heavy work
- ✓ Moulded riffles (ridges) hold the fine gold; light and tough

Specifications

Type	Finishing / clean-up gold pan (also suited to children & smaller hands)
Diameter	10 in (254 mm / ~25 cm)
Depth	~50 mm (2 in)
Material	High-impact moulded plastic (ABS), one-piece; rust & UV resistant
Riffles	Moulded riffle wall with fine 'finishing' riffles to trap fine gold
Base	Wide flat textured bottom to hold fine gold when swirling
Colour	Green (high-contrast to spot colour/gold against)
Weight	~85 g (approx 3 oz)
Buoyancy	Floats in water — won't sink if dropped in the creek
Best used for	Final clean-up of concentrates from a larger 12–15 in pan; teaching kids to pan
Care	Rinse after use; no metal parts so it won't rust
In the box	1 x 10 in gold pan
