

14" Gold Pan with Riffles

Brand: Deep Lead • Category: Gold Panning & Prospecting

Overview

A gold pan is the simplest way to find gold: you scoop creek gravel and water into this shallow dish, swirl it, and let the heavy gold sink to the bottom while the lighter sand and gravel wash out over the edge. The 'riffles' are the moulded ridges along one side, and they trap the fine gold so it doesn't wash away with everything else. At 14 inches across it's a good all-round size for beginners and experienced panners alike, and the green colour makes specks of gold easy to spot against the bottom.

Key features

- ✓ A shallow dish for separating gold from creek gravel by swirling it with water
- ✓ Moulded riffles (ridges) along one edge trap the fine gold as you wash
- ✓ 14 inches across, a solid all-round size in tough, lightweight polymer
- ✓ Green finish makes gold easy to see; pairs with our classifiers and snuffer bottles

Specifications

Type	Riffled gold panning pan
Diameter	14 in (35.6 cm) nominal top rim
Material	Impact-resistant plastic — rust- and acid-proof, lightweight
Colour	Green
Riffle system	Dual riffles: (1) 3 × deep riffles, (2) bank of micro (shallow) riffles
Deep riffle size	3 in long × 1/4 in (≈6 mm) deep
Base	1/8 in (≈3 mm) deep round drop-centre base for gold trapping
Weight	approx. 250 g
Best for	Panning classified gravels, black-sand separation, final concentrate clean-up
Care	Rinse clean; do not oil or wax — matte surface aids fine-gold capture
Brand	Deep Lead (Australian prospecting store label; generic pan)
