

Minelab Pro-Find 40 Pinpointer

Brand: Minelab • Category: Pinpointers • Part number: 3226-0005

Overview

New to detecting? A pinpointer is a small hand-held probe you use once your detector has flagged a buried object: you wave it inside the hole and it beeps and vibrates faster as its tip nears the metal, so you find the exact spot instead of sifting handfuls of soil. Minelab's Pro-Find 40 is waterproof to 3 m and has a "ferrous tone" that sounds different for iron, so you can pick the likely junk (nails, bottle tops) before you dig. It runs on a standard 9V battery, so there's no built-in lithium and no dangerous-goods shipping delays.

Key features

- ✓ A hand-held probe that pinpoints the exact spot of a buried find after your detector narrows it down
- ✓ Beeps and vibrates faster as the tip nears the metal; waterproof to 3 m
- ✓ "Ferrous tone" sounds different for iron, so you can skip likely junk before digging
- ✓ Runs on a standard 9V battery — no lithium, so no dangerous-goods shipping delays

Specifications

Technology	VLF + DIF (Detector Interference Free)
Sensitivity	5 adjustable levels
Target ID	Ferrous Tone ID (dual-tone audio)
Alerts	Audio (on/off), vibration & LED flashlight
Detection depth	~10% deeper than Pro-Find 35
Waterproof rating	To 3 m (10 ft)
Length	247 mm (9.7 in)
Weight	234 g with battery (188 g / 6.6 oz without)
Battery	9V PP3 (incl.), ~20 hrs nominal
Extra features	Rapid Re-tune, Lost alarm
Warranty	24 months
In the box	Pinpointer, holster, lanyard, 9V PP3 battery, multi-language instructions
