

Polar Fleece Neck Tube (Camo)

Brand: AFN • Category: Apparel & Field Gear

Overview

A neck tube (or 'buff') is a simple seamless loop of fleece you wear round your neck and pull up over your face when the wind bites. Prime detecting is autumn and winter, and goldfields mornings are cold — this keeps your neck and face warm, packs into a pocket, and being all fabric it has no metal to set your detector off.

Key features

- ✓ Seamless fleece tube — pull it up over your neck and face
- ✓ Warmth for cold goldfields mornings
- ✓ All fabric, no metal — won't bother your detector
- ✓ One size, fully washable
