

Stealth Digger with Belt Holster

Brand: Detect-Ed • Category: Digging & Recovery Tools

Overview

The Stealth Digger is a compact, tough digging knife for getting your finds out of the ground. Its serrated edge slices cleanly through turf and roots so you can cut a neat "plug" — the small lump of soil you lift out to reach the object, then drop straight back so the ground looks untouched. It comes with a belt holster so it rides on your hip and stays within reach. Recover quickly, and leave the spot the way you found it.

Key features

- ✓ A compact digging knife for cutting your finds out of the ground
- ✓ Serrated edge slices through turf and roots for a clean "plug" you can drop back in
- ✓ Cuts a neat hole, so you can leave the ground the way you found it
- ✓ Includes a belt holster so it's always on your hip
