

# Treasure Pouch (Land & Sea)

Brand: Detect-Ed • Category: Bags, Pouches & Storage

## Overview

A finds pouch is a bag you wear on your belt to hold what you dig up, and this one is built for wet work. The sides and bottom are a rubberised mesh, so water and sand drain straight through and you're left with your finds instead of a pouch full of wet grit. It has two zip pockets to keep the keepers apart from the junk, rust-proof zips for salt water, and rides on an adjustable belt.

## Key features

- ✓ A belt pouch for your finds, built for the beach and water
- ✓ Rubberised mesh sides and bottom drain water and sand, keeping your finds
- ✓ Two zip pockets — keepers in one, rubbish in the other
- ✓ Rust-proof zips for salt water; made by Detect-Ed

## Specifications

|                    |                                                                                                            |
|--------------------|------------------------------------------------------------------------------------------------------------|
| Type               | Metal-detecting finds pouch (land & sea / water-friendly)                                                  |
| Pouch dimensions   | 27 x 21.5 cm (10.6" x 8.4")                                                                                |
| Compartments       | Two zip pockets                                                                                            |
| Draining mesh      | Rubberised mesh sides + mesh bottom; sifts out water, sand & dirt, retains fine targets (chains, earrings) |
| Mesh benefit       | Rubberised, impervious to sharp objects (unlike netted bags)                                               |
| Zippers            | Heavy-duty plastic, rust- & seize-proof, with pull loops                                                   |
| Pinpointer holster | Vertical holster + stainless-steel eyelet for pinpointer lanyard                                           |
| Carabiner          | Included (for rings / attaching tools)                                                                     |
| Belt               | 56-124 cm adjustable webbing, side-release buckle, one-size-fits-all                                       |
| Water use          | Salt-resistant; suits land, beach or underwater detecting - doesn't rust or seize                          |
| Colour             | Black                                                                                                      |
| Weight             | approx. 0.25 kg                                                                                            |
